

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

# THE AMERICAN NATURALIST

A MONTHLY JOURNAL  
DEVOTED TO THE NATURAL SCIENCES  
IN THEIR WIDEST SENSE

## CONTENTS

	<i>Page</i>
I. The Anatomy of the North American Coniferales together with Certain Exotic Species from Japan and Australasia. Part I.	
PROFESSOR D. P. PENHALLOW	243
II. The Sense of Hearing in the Goldfish <i>Carassius auratus</i> L.	
HENRY B. BIGELOW	275
III. Certain Undetermined Factors in Heredity and Environment.	
PROFESSOR J. G. PEIRCE	285
IV. On the Dentition of <i>Rhynchodus</i> and other Fossil Fishes.	
DR. C. R. EASTMAN	295
V. Further Instances of Parietal Division	
DR. ALES HRDLICKA	301
VI. Comparison of the Provisional Schemes of the Classification of Birds	
DR. B. W. SHUFELDT	311
VII. Notes and Literature: <i>General Biology</i> , A Well Balanced Book on Theoretical Evolution, Experiments in Heredity, Walks in New England— <i>Zoölogy</i> , Influence of Man on the Distribution of Reptiles and Mammals in Patagonia and Fuegia, The Rat-tailed Rotifers, Gardiner's Reports on the Fauna and Geography of the Maldive and Laccadive Archipelagoes, Position of the Gordiacea, North Atlantic Invertebrata— <i>Botany</i> , The Desert Botanical Laboratory.	327

THE AMERICAN NATURALIST is an illustrated monthly magazine of Natural History, and will aim to present to its readers the leading facts and discoveries in Anthropology, General Biology, Zoology, Botany, Paleontology, Geology and Physical Geography, and Mineralogy and Petrography. The contents each month will consist of leading original articles containing accounts and discussions of new discoveries, reports of scientific expeditions, biographical notices of distinguished naturalists, or critical summaries of progress in some line; and in addition to these there will be briefer articles on various points of interest, editorial comments on scientific questions of the day, critical reviews of recent literature, and a quarterly record of gifts, appointments, retirements, and deaths.

All naturalists who have anything interesting to say are invited to send in their contributions, but the editors will endeavor to select for publication only that which is of truly scientific value and at the same time written so as to be intelligible, instructive, and interesting to the general scientific reader.

All manuscripts, books for review, exchanges, etc., should be sent to THE AMERICAN NATURALIST, Cambridge, Mass.

All business communications should be sent direct to the publishers.
